

AAA DEPENDABLE AIR: installation, preventive maintenance, repair service

AAA Dependable Air is a local enterprise well known for its experience and reliability in terms of HVAC systems and air treatment. The company has been implanted in residential and commercial markets in Florida for over 15 years.

In 2008, Fabrice Herzstein, owner of AAA Dependable Air, decided to create a joint venture with Gilles Bourquin owner of CLIM DENFERT, a French group that has been operating and innovating Air Conditioning Systems for decades in France.

This partnership created a synergy and gave AAA Dependable Air access to new technologies. The joint venture brings together a wide set of technical skills, a high focus on customers' satisfaction and a strong knowledge in terms of environmental and health standards.

Meir GENOUNE

Our employees are highly trained to perform maintenance and emergency services. Our focus is to provide the best service to our clients. We have teams working 7 days a week, and we will thrive to always answer your needs in a timely manner.

CLIM DENFERT in Miami

AAA DEPENDABLE AIR PROMISES

We realize how important it is to protect the environment and the health of your loved ones.

- We are fully compliant with USA standards and regulations
- We thrive to innovate and anticipate the norms regarding the use of refrigerant gases.

R22 installations have been forbidden in France since 2001 but are still used in the USA. This refrigerant gas, dangerous for the ozone, should be progressively replaced by 2010. AAA Dependable Air is proud to have already changed his equipment and systems in order to keep a greener planet.

- Our systems provide effective answers to health concerns. For instance, the company uses high performance filters that help keep the air fresh and clean. In fact, Air Sponge Filters are up to 30 times more effective in capturing harmful fine particles such as mold, bacteria, viruses and fungi. This system is recommended for people prone to allergies and asthma attacks.

Efficiency, economy and comfort

Air Zone USA is the inventor and European leader of the zonification. This system enables the control of the temperature depending on the zone, for instance you may choose to have a temperature of 75 degrees in the living room, 70 degrees in the kids' bedroom, and shut down the system in the empty rooms.

AAA Dependable Air is happy to be partnering with Air Zone USA, recently established in Miami. AAA Dependable Air is also pleased to announce that it can install the Air Zone on an existing HVAC Systems and thus help you make your HVAC more energy sufficient without having to replace it.

Quality, performance, innovation

AAA Dependable Air uses the best technologies and materials in the market such as Daikin, Trane, Rheem, American Standard, Heil, Rudd, Mitsubishi, Lennox, Carrier, Goodman, Amana products.

Please call us today, our counselors are here if you need advices on existing or future HVAC installations. Our teams are standing by to serve all your needs.

Your comfort and the protection of the environment are our top priorities; call us if you would like to set up an appointment with one of our partners to get a free energy survey of your house.
